

Arivu Selvi G M

UI/UX Designer

UI/UX Designer with a track record of owning full product design cycles — from zero-to-one research through developer handoff. Known for building scalable design systems that reduce inconsistency and accelerate delivery. Combines user psychology, business thinking, and AI-assisted tooling to ship experiences that convert and retain. Currently designing client-facing products at a remote agency with zero design backlog.

WORK EXPERIENCE

UI/UX Designer

Grey Feathers

03/2025 - Present

Remote

Tasks

- Owned complete end-to-end user interface design lifecycle across multiple client products, from user research and information architecture through wireframing, prototyping, and developer handoff.
- Reduced client requirement clarification rounds by 40% by introducing a structured intake framework that maps business goals directly to user flows before wireframing begins.
- Built and maintained a scalable design system in Figma — including components, tokens, typography, and color systems — cutting UI production time by approximately 30% across projects.
- Drove a 25% improvement in design-to-dev accuracy by establishing a Figma-to-developer handoff protocol with annotated specs and component documentation.
- Conducted usability testing and iterative design reviews with clients, maintaining 100% feedback-to-iteration turnaround within 24 hours and earning repeat project extensions from 2 of 3 initial clients.
- Integrated AI-assisted design tools including Figma Make for ideation and rapid prototyping, reducing ideation-to-wireframe time from 2 days to under 4 hours.
- Ensured accessibility, responsive design, and visual consistency across web and mobile platforms in alignment.
- Managed stakeholder relationships independently, presenting design progress, gathering feedback, and aligning design decisions with business objectives.
